About me:

Passionate software engineer with a strong foundation in computer engineering, artificial intelligence, and cybersecurity. Experienced in designing and building full-stack applications and machine learning systems. Motivated to solve real-world problems through technology, continuously learn new tools, and contribute effectively in collaborative engineering environments.

Education

Ruppin Academic Center

Bachelor of Science (B.Sc.) in Computer Engineering, Graduated with Honors.

2020-2024, GPA: 90.

Skills:

Programming Languages: C, C++, C#, Java, Python, JavaScript, PHP, SQL

Web / Full-Stack Development: React, Node.js, Express, HTML, CSS, REST APIs

Databases: SQL, MongoDB, PostgreSQL.

Tools & Engineering Practices: Git, .NET, Selenium, Test Automation, Object-Oriented Programming (OOP), Data Structures & Algorithms

AI & Machine Learning: Machine Learning, Deep Learning, Artificial Intelligence.

Systems & Cybersecurity: Operating Systems, Linux, Cloud Computing, Compilation Concepts, Cybersecurity Fundamentals

Soft Skills: Problem Solving, Teamwork, Communication, Time Management, Fast Learning, Adaptability, Ownership, Attention to Detail

Projects:

TumorSense – Brain Tumor Detection System

- Developed a full-stack medical application for automated brain tumor detection and classification from MRI scans
- Designed and trained a Convolutional Neural Network (CNN) model for medical image analysis
- Built a Flask-based backend to serve the model and process user-uploaded images
- Integrated the ML pipeline into a user-friendly web interface
- Focused on accuracy, usability, and real-world applicability in healthcare AI systems

Languages:

English- fluent, Hebrew- fluent, Arabic: native.
